About the Organizer

Hunan Children's Hospital is a comprehensive and specialized children's hospital which integrates clinical, scientific research and teaching. It became the first batch of Third Grade Class A hospital in China upon comprehensive review in 1995 and passed two certifications of ISO9001 International Standard for Quality Management System and ISO14001 Environment Management System in 2004.

From 2013, the international management standard of US JCI was fully implemented in the Hospital. With the concept of internationalization and innovation, the Hospital has strengthened cooperation and exchange with an open and positive attitude, established an independent Foreign Affairs Management Department, which is also the Key International Pediatric Medical Center approved by Hunan Provincial Health and Family Planning Commission. At present, the Hospital is the only Foreign-aid Pediatric Medical Training Unit in China. The Hospital is not only the only Foreign-aid Pediatric Medical Training Unit in China, but also the "Foreign-aid Pediatric Medical Training Base in Hunan Province". Since 2006, 68 foreign aid training projects have been carried out, more than 2,000 trainees from over 100 countries and regions have received training, with over 10 training topics including pediatric severe disease, neonatal medicine, pediatric care technology, maternal and infant health care, inspection technology, traditional Chinese medicine technology and hospital management, involving English, French, Portuguese, Russian and other languages.

In 2016, the Hospital assumed two foreign -aid innovative projects of Maternal and Infant Health Project of the National Committee on Health and Family Planning including pediatric appropriate techniques in aid for Sierra Leone and Cambodia. The Projects provided about 200 medical staff from the aided countries, and offered ward rounds and free diagnose for over 200 local children, resulting in good social effects, which were given important reports by People's Daily. Especially, as for the implementation of the Cambodian Women's and Children's Health Project, the Hospital signed a long-term cooperation agreement with the Cambodian National Children's Hospital under the witness of Li Bin, the former Head of National Health Planning Commission of P.RC, and MAM BUN HENG, the Minister of Health of Cambodia.

In 2017 and 2018, the Hospitals sent medical experts to Zanzibar and Fiji to organize overseas training projects on hospital management, pediatric appropriate techniques and pediatric care to provide local hospital managers and medical

technicians with comprehensive training, which highly appraised by Ministry of Health of Zanzibar and Fiji and our embassies in Zanzibar and Fiji. The training project has turned out to successes with good social benefits and international impact, which was given follow-up reports by Hunan Daily, Health Daily, China Daily and Zanzibar Fiji local media. With the deepening of international cooperation among hospitals, the Hospitals actively responded to the "Belt and Road Initiative" and led the establishment of the "Child Health Cooperation Network of Developing Countries" aimed at improving management of medical services, enhancing exchange and cooperation in the field of medical specialty and technology, improving high-quality personnel training and scientific research cooperation in pediatrics related fields and enhancing the medical service ability and medical service management level of China and developing countries.

To facilitate the teaching of foreign-aid human resources development project, the Hospital has set up its own teacher team, for which the hospital experts and professors have been selected according to classification of professional characteristics, personal expertise, comprehensive management talents and technical personnel, including 3 experts who are awarded with Special Allowance of the State's Council, 20 experts taking positions in National Professional Committees, 30 experts taking positions in Provincial Professional Committees, and more than 100 teachers who have worked or studied abroad.

In addition, according to the needs of the training theme, with platform of "Hunan Medical Assistance Training Base", we appointed the foreign aid training teachers from elite and outstanding experts of the Province's medical and health system so as to constantly expand the teaching staff team, among them are former health officials stationed in WHO, medical and health policy experts, medical reform experts, disease prevention and control experts, maternal and child health experts, pediatrics expert, nursing experts, laboratory medicine experts, traditional Chinese medicine experts and so on.

At the same time, internationally renowned experts who come to the hospital to exchange lectures are also arranged to participate in the teaching and exchange activities of foreign aid. Foreign aid trainees are invited to participate in the large-scale international medical forum hosted by the Hospital every year invites and it also provides an opportunity for individual trainees to exchange and share experiences formally. Various forms of training enrich the training content and create an

	<p>atmosphere of international academic exchange.</p> <p>The Hospital attaches great importance to the training of international talents and has created a "international medical simultaneous interpretation team" of more than 20 staff including doctors, nurses, drugs and technicians, which provides a good translation guarantee for medical foreign aid teaching. The Hospital has created a good atmosphere of foreign language learning, such as regularly publishing the English internal publication Pediatrics and Adolescent Medicine, ward rounds in English language, English corner activities and English training, etc. In 2017, the Hospital organized translation training which improves the professional level of translators.</p> <p>In addition, to ensure that quality of translation and the effect of the teaching, the International Cooperation And Exchange Department organized the trainees and teachers to carry out the training, lecturers and the translators are required to pass the test in batch, and the translation of the courseware must be examined and proofread before they are used for the class formally. The hospital also specially organized the English teaching competition and other activities to promote the progress of the teaching ability.</p>
<p>Seminar/Training Course Content</p>	<p>Sponsored by Ministry of Commerce of People’s Republic of China, 2019 Training Course on Nursing Technology of Maternal Health Care for Developing Countries will be held in Changsha by Hunan Children’s Hospital during August 21 to October 9, 2019. The Training Course will focus on the theme “Maternal Health Care” to deliver the following subjects: pregnancy-induced hypertension, infertility, delivery room management, postpartum hemorrhage and infection, neonatal asphyxia resuscitation, premature developing care etc. All kinds of teaching methods will be adopted such as clinical practice, medical rounds, case discussion so as to improve the training quality. During the training period, all the participants will be invited to take a trip to some provincial pharmaceutical industry, and humanistic resort, so as to broaden their knowledge about China and Hunan culture, and improve our friendship.</p>
