About the Organizer	<p>Xiyuan Hospital of China Academy of Chinese Medical Sciences, founded in 1955, was designated as the first AAA-grade TCM hospital by the government. As a national model TCM hospital and medical Insurance-designated hospital, Xiyuan Hospital is a part of International Collaborating Center for Traditional Medicine of the World Health Organization (WHO). It includes national TCM Therapeutic Centers of Cardiology, Hematology, Gerontology, Oncology, Digestive Diseases and Respiratory Diseases.</p> <p>At present, the Hospital has 28 national outstanding experts; 180 professors and vice professors; 18 research centers; 54 clinical departments; 18 ward regions with 569 beds in inpatient. The daily outpatients reach more than 7000 people, and more than 14,000 inpatients were out of hospital every year. The Hospital is equipped with advanced modern facilities including German Doly Dorsos DSA device, MRI, ECT, spiral CT, ELIPE-flow cytometer, and constructed with emergency room, clean BMT room, hemodialysis room, interventional center, CCU and ICU in inpatient building.</p> <p>In recent years, the Hospital has awarded more than 180 researching prizes by the State and Minister. More than 50 achievements have already been transferred to domestic/foreign factories, including Wei Yang Ning which technique has successfully been transferred to Japan. The Hospital includes four national AAA-grade laboratories and three Minister's TCM key departments. Besides, we have made co-operations with more than 100 scientific research institutions for undertaking more than 100 research projects from the State, the Ministry and China Academy of Chinese Medical Sciences.</p> <p>At present, the Hospital has 2 academicians; 74 supervisors for postgraduate of Master and 30 for Doctor's; 2 postdoctoral workstations. We trained more than 200 postgraduates and 18</p>	

	<p>postdoctoral, and held 15 TCM training courses with more than 600 professionals for doctors of Western Medicine.</p> <p>Since 1955, the Hospital has received more than 1000 foreign students or doctors from more than 100 countries and regions.</p>
<p>About the Seminar</p>	<p>The following topics will be given: the Basic Theory and Diagnosis of Traditional Chinese Medicine (TCM); Development Strategy of TCM; Chinese Herbs and Prescription; TCM Rehabilitation Skills; TCM Culture; Application of TCM Skills, etc.</p> <p>This seminar will effectively conduct the multi-level foreign-aid medical cooperation to meet the needs of the related courses. It resort to different forms such as presentations on various subjects, exchange of ideas in meetings, visits and discussions, so as to ensure the participants have a general idea about the basic theory of traditional Chinese medicine, TCM diagnosis and its therapeutic effects. The participants will also get a better understanding of the application and effects of TCM acupuncture and moxibustion, therapeutic treatment for special diseases, and the current situation of TCM development.</p> <p>The seminar aims at, through mutual exchanges, improving friendship relations between China and other developing countries, strengthening their trade and economic cooperation, and promoting human resources and economic and social development. Through the program, the participants will get a fully understanding of the current situation and prospect of traditional Chinese medicine to reference in their own traditional medicine and their future work and application. In doing so, the program will lay a good foundation for further sustainable cooperation between China and other developing countries.</p>
