About the Organizer	<p>China Training Center of Reproductive Health and Family Care (CTC) located in Taicang, Jiangsu Province and established in October of 2005, is a non-profit organization and state-level training center under the instruction of National Health Commission (NHC). Since its establishment, CTC fully plays the role of international communication and cooperation by actively providing professional training for government officials programme managers, technical service personnel from developing countries on Reproductive Health, Maternal and Child Health, Population and Poverty Reduction, etc. Diversified in content, elaborated in service, managed with creation, CTC guarantees a qualified and efficient outcome by highlighting the theme with professional thoughts and perspectives in contents setting, lecturers inviting and spot choosing. Principled with Diplomacy is No Small Matter, CTC attaches importance to security, which gets great support from local government with backup in food, health care, medical treatment and physical security from Market Supervision Administration, health department, Police Station and department of Foreign Affairs, which guarantees the smooth running of each foreign-aid training programme. Since 2009, CTC has successfully organized 26 foreign aid human resource development programmes initiated by the Ministry of Commerce and provided all kinds of administrative and technical training programmes in China for 997 population affair officials and technical service providers from over 70 developing countries in Asia, Africa, Latin America, East Europe, and Oceania. The participants include 87 ministerial-level senior officials and 167 director-general-level officials. Till last year, CTC has been implementing 8 training programmes on Maternal and Child Health with 269 government officials and doctors from different developing countries participated in.</p>	
Training Course Content	<p>Besides topic discussion, the Seminar will arrange tours for official participants to observe maternal and child health care service agencies at all levels in Shanghai province, Hangzhou (Zhejiang province) and Taicang (Jiangsu Province). Through observation and communication, participants will experience the functioning of public service system for maternal and child health care at provincial, municipal and county level in China. Furthermore, the Seminar will also arrange activities for participants to enjoy Chinese traditional culture so that they can have a more comprehensive understanding of China's social and economic development.</p> <p>I . Aims</p> <p>By introducing practice and experience in promoting maternal and child health, the Seminar on Promoting Maternal and Child Health for Developing Countries will emphasize in sharing China's experiences of policy, law, management and technical service in the above field; enhance the level of policy and law making, programme management capability, professional skill for maternal and child health services in developing countries; help</p>	

improve service quality in maternal and child health and reproductive health and promote to establish a win-win South-South cooperative partnership among developing countries in above areas.

II. Objectives

Participants can learn the current situation, developing trend and prospect of China's maternal and child health. 2. Participants can learn the policy and management of China's maternal and child health care services. 3. Participants can share the experience in promoting maternal and child health of China. 4. Participants can provide suggestions on the related field based on his/ her own nation's condition.

III. Core Contents

The contents composed of 3 parts: lectures, experience sharing and field visits.

Lectures: The lectures will consist of macroscopic strategy and outcome sharing. In macroscopic strategic perspective and based on frames of ICPD POA and MDGs, seminar will review the latest progress and dynamics of promoting maternal and child health care in international community by setting lectures such as *Report on China's Maternal and Child Health Progress, Financing Research on Maternal and Child Health*, so as to help improve the capacity in policy-making and law-making field by generally introducing China's current achievement and future challenges. In outcome perspective, seminar will share China's experience and strategy in promoting maternal and child health by setting lectures such as *China's Experience and Strategy on Promoting Maternal Health, Planning and Management in Maternal and Child Health Care*.

Experience Sharing: Based on learning and national situation, participants will seek for better cultivating the field through challenges discussing and experience sharing.

Field Visits: Seminar will arrange participants visit the maternal and child health care institutions so that participants can better understand the current situation of the public service system in provincial-, municipal- and county- levels. In addition, participants will have a round understanding of China's social economic development through traditional cultural activities.
