

Seminar on Agricultural Industrial Development for B&R Countries

Program	Seminar on Agricultural Industrial Development for B&R Countries		
Organizer	Yangling International Exchange Center of Agricultural High-tech Industry Demonstration Zone		
Time	Nov. 9-Nov. 29, 2022	Language	English
Countries invited	Developing countries	Number of participants	26
Training Objectives	This seminar mainly introduces China's agricultural development, shares the main initiatives and achievements of China's agricultural development, and discusses the effective ways to develop agricultural industry in "Belt and Road" countries. Through the training, we will share China's successful experience in agricultural industry development, accelerate the transformation and upgrading of agricultural industry in "Belt and Road" countries, deepen the exchange and cooperation between China and "Belt and Road" countries, and achieve common development.		
Requirements for participants	Professional background	Field or specialty: Agricultural economic management, agricultural policy making, agricultural industry development and other fields Jobs:Divisional officials and agricultural policy experts, etc.	
	Language Proficiency	Participants should have the ability to listen, speak, read and write English, the working language of the project	
	Others	Ability to use the ZOOM meeting platform to complete training schedules	
Introduction of training content	1.Introduction of main training courses The seminar mainly consists of four sections: general courses, lectures and workshop. The general course mainly introduces the national conditions of China and the experience and stories of Chinese pandemic prevention and control. The lectures are combined with the theme of the training course to introduce agricultural industrialization management and policies, agricultural transformation, upgrading and multi-industry integration development. (1) China's national conditions: mainly introduces Chinese history and folk culture. (2) China's pandemic prevention and control: mainly introducing the relevant initiatives, experience and main practices of China and the international community in combating the COVID-19. (3) China's agricultural industrialization operation and policies: mainly introduces the background, development history, difficulties and countermeasures of China's agricultural industrialization operation, construction planning of agricultural industrialization operation and relevant national policies, etc. (4) Main modes of agricultural industrialization development: mainly introduces the meaning, characteristics, main practices and benefits of eight major modes of China's agricultural industrialization, including the mega mode, Dalian three-tier park construction mode, export-oriented high-efficiency agricultural science and technology park, Wuzhou mode and high-efficiency agricultural demonstration park.		

(5) Agricultural transformation, upgrading and multi-industry integration development: Combining local resources and industrial base, perspectives of agricultural transformation and upgrading are introduced mainly from the aspects of structural adjustment and industrial integration, scientific and technological innovation, etc.; cases of integration development of modern agriculture and rural tourism are analyzed.

(6) Rural collective economy development mode: mainly introduce the development mode and ideas of rural collective economy such as rural cooperative operation and management, idle assets revitalization, and development of industries with local specialty.

(7) Agricultural products development and industrial chain construction: Introduce important aspects of agricultural industry development such as deep processing of agricultural products, industrial cluster development, branding and innovative marketing channels.

(8) International agricultural park construction and management: Introduce the advantages and development overview of agricultural parks, international agricultural park construction planning and successful cases.

2. Cloud tour introduction

The video of the visit to Yangling Smart Agricultural Industrial Park and Agricultural Products E-commerce Industrial Park will be played to learn modern agricultural production technology on site, understand new ways and modes of international cooperation in the field of agricultural industry, and further understand the lectures.

3. Introduction to the workshop

Participants are invited to make national reports on the current situation and outlook of agricultural development in their own countries, and agricultural experts are invited to host discussions on countermeasures for the development of agricultural industries in the Belt and Road countries.

We invite the person in charge of Yangling International Cooperation Company to communicate with the participants on the import and export business of agricultural products and seek cooperation opportunities.

Note: The above course content is subject to the actual schedule.

Teaching method: Online lecture.

Lecture time: In principle, two lectures or seminars of two hours each will be arranged for each working day.

4. Introduction of the lecturers

The lecturers are mainly from Northwest Agriculture and Forestry University, Xi'an Jiaotong University and Shaanxi Provincial Party School. Lecturers have rich research and practical experiences in the field of agricultural policy and agricultural industry development, which can ensure high quality and efficient completion of teaching.

5. Materials to be prepared

In order to facilitate the seminar, please prepare communication materials related to the theme of the seminar, such as: (1) basic national conditions: the basic situation of your country, the development of your country's agricultural industry, etc.; (2) introduction of related industries: introduce the current situation and trends of the development of your country's agricultural industry, the need for international cooperation, etc.

Remarks	<p>1. Disciplinary requirements: During the implementation of the program, please strictly abide by the program schedule. During the teaching period, please observe the teaching time and teaching discipline, attendance record will be an important basis for issuing the training completion certificate. Participants are required to enter the ZOOM classroom 5 minutes early to prepare for the class. Change your personal name to English (same as your passport) name. The facilitator will mute everyone during the class. When entering the room to prepare for class, please ask the participants to turn on the video function to facilitate the roll call.</p> <p>2. This training is conducted online using the ZOOM platform, and you need to have internet, computer, microphone, camera and other related equipment.</p> <p>3. Information security: To protect information security and personal privacy, please do not record, take screenshots or share to any social media during the class. Course materials will be sent to participants after the class.</p> <p>4. Participants are required to prepare seminar materials according to the seminar exchange schedule and submit relevant electronic materials as required.</p> <p>5. The course is equipped with English and Chinese consecutive interpretation.</p>
Introduction of the Organizer	<p>As the first national agricultural high-tech industry demonstration zone in China, Yangling Demonstration Zone is one of the most abundant regions in China for agricultural science and technology, talents, resources and other innovative elements, gathering more than 70 disciplines such as agriculture, forestry and water, and more than 7,000 talents in agriculture, science and education. Yangling has been hosting foreign aid training programs since 2005, and in August 2011, the Ministry of Commerce set up a training base for foreign aid in dry crop agriculture technology in Yangling. At present, 133 foreign aid training programs for developing countries have been held in Yangling Demonstration Zone, with training topics covering cooperation in agricultural industry, poverty reduction, soil and water conservation, dry farming, modern agricultural economic management, environmental control of agricultural production in dry areas, etc. More than 3,300 trainees from more than 110 developing countries have participated in training in Yangling. Through training and exchange, Yangling Demonstration Zone has established cooperation with more than 60 countries around the world. Experts from Yangling Demonstration Zone have participated in many foreign aid project of developing countries such as Ethiopia, Egypt, Cameroon, Sudan and Eritrea, providing technical support for local agricultural development and playing an important role in promoting the development of modern agriculture in the relevant countries.</p> <p>In recent years, Yangling Demonstration Zone has conducted in-depth research in basic agricultural fields such as crop breeding, environmental control of agricultural production and soil and water conservation. Universities and scientific research institutions in the region have cooperated extensively with scientific research institutions in developing countries such as Pakistan and Kenya, and have conducted in-depth discussions on common challenges faced by agricultural production in developing countries. The workshop on agricultural industry development in Yangling can give full play to Yangling's advantages in agricultural science and education resources, help the "Belt and Road" countries improve their agricultural innovation capacity and cultivate agricultural talents, and at the same time promote cooperation with related countries in agricultural industry. It will also promote cooperation with related countries in agriculture.</p>
