Course materials will be sent to participants after the class.</li> <li>5. Participants are required to prepare seminar materials according to the seminar exchange schedule and submit relevant electronic materials as required.</li> <li>6. The course is equipped with English and Chinese consecutive interpretation.</li> </ol>
Introduction of the Organizer:	<p>Founded in 1997, Yangling Demonstration Zone is China's first national agricultural high-tech zone, which has gathered more than 7,000 agricultural, scientific and educational talents in agriculture, forestry and water disciplines, and more than 70 agricultural research institutions and platforms at the provincial and ministerial levels, making it one of the areas with the greatest concentration of innovation factors such as agricultural science and technology, talents and resources in China. The State Council has issued three approvals to support the development and construction of Yangling Demonstration Zone, supporting it to carry out modern agricultural demonstration in arid and semi-arid areas, focusing on scientific and technological innovation, scientific and technological entrepreneurial extension services, industrialization demonstration and international cooperation, accelerating the transformation of traditional agriculture into modern agriculture and building an important platform for international agricultural science and technology cooperation.</p> <p>Since 2005, Yangling Demonstration Zone has been undertaking foreign aid training programs, and in August 2011, the Ministry of Commerce established a foreign aid training base for China's dry crop agriculture technology in Yangling. Through training and exchange, Yangling Demonstration Zone has established a training faculty consisting of more than 100 industry experts, and selected a number of distinctive training bases for on-site teaching and study visits. Soil and water conservation, water conservation and irrigation, facility agriculture, e-commerce, and governing capacity building as the core of the training curriculum system, accumulated rich experiences in foreign aid education, established a team of experienced and well-known experts,</p>

	<p>trained and reserved talents in the field of agriculture for the relevant countries, which was unanimously affirmed by the participants of the training countries.</p> <p>The scientific research institutions, mainly Northwest Agriculture and Forestry University in the region, have conducted in-depth research in agricultural policy making and formed a large number of experiences which can be promoted and copied by other countries. The workshop on agricultural policy formulation for "One Belt and One Road" countries held in Yangling can strengthen the communication and exchanges between Yangling and relevant countries in agricultural policy formulation and industrial development, share their respective experiences and practices in top-level policy design, seek the path of in-depth and extensive cooperation, and lay the foundation for long-term and practical cooperation.</p>
