Please communicate with the organizer in advance if you have religious taboos.</p> <p>4. Information security: To protect information security and personal privacy, please do not record, take screenshots or share to any social media during the class. Course materials will be sent to participants after the class.</p> <p>5. Participants are required to prepare seminar materials according to the seminar exchange schedule and submit relevant electronic materials as required.</p> <p>6. The course is equipped with English and Chinese consecutive interpretation.</p>
Introduction of the Organizer:	<p>As the first national agricultural high-tech industry demonstration zone in China, Yangling Demonstration Zone has undertaken international exchange and cooperation as one of its national missions. Foreign aid training is an important way to carry out international exchange. In August 2011, the Ministry of Commerce established the China Dry Crop Agricultural Technology Training Base in Yangling, which main function is to provide foreign human resource training for developing countries.</p> <p>At present, 133 foreign aid training programs for developing countries have been held in Yangling Demonstration Zone, with training topics covering cooperation in agricultural industry, poverty reduction, soil and water conservation, dry farming, modern agricultural economic management, and environmental regulation of agricultural production in dry areas, etc. A total of more than 3,300 trainees from more than 110 developing countries have participated in training in Yangling. Through training and exchange, Yangling Demonstration Zone has established cooperation with more than 60 countries around the world. Experts from Yangling Demonstration Zone have participated in many foreign aid projects of developing countries such as Ethiopia, Egypt, Cameroon, Sudan and Eritrea, providing technical support for local agricultural development and playing an important role in promoting the development of modern agriculture in local areas.</p> <p>As the first national agricultural high-tech industry demonstration zone in China, Yangling is one of the areas with the greatest concentration of innovation factors such as agricultural science and technology, talents and resources, gathering more than 70 disciplines such as agriculture, forestry and water, and more than 7,000 talents in agricultural science and education. In recent years, Yangling Demonstration Zone has carried out in-depth research in basic agricultural fields such as crop breeding, environmental regulation of agricultural production, soil and water conservation, etc. Universities and research institutions in the region have cooperated extensively with research institutions in a wide range of developing countries such as Pakistan and Kenya, and have conducted in-depth discussions on common challenges facing agricultural production in developing countries, providing a broad basis for exchange and cooperation in the agricultural field.</p> <p>The workshop on agricultural capacity cooperation for developing countries held in Yangling can give full play to Yangling's advantages in agricultural science and education resources, help</p>

	<p>developing countries improve their agricultural innovation capacity and cultivate agricultural talents, and at the same time promote in-depth cooperation with related countries in agricultural industry and capacity.</p>
