<p>About the Organizer</p>	<p>Jiangxi College of Foreign Studies is the only higher vocational college in Jiangxi Province that mainly cultivates foreign language and foreign trade and economic application talents, and is the first training base for international business officials in China. The college is a national high-quality vocational institution, the first batch of model higher vocational institutions in Jiangxi Province, and has been awarded the "Top 50 International Influence" of the national vocational institutions for two consecutive years.</p> <p>The college has more than 15,000 students and 47 majors, including 11 languages like English, French, Arabic, Spanish, Portuguese and Russian. At the same time, the college has built a hotel integrating training, teaching, conference and leisure, which is well-equipped and boasts strong reception capacity.</p> <p>Since 2010, the college has been carrying out foreign aid training missions and the topics covering more than 10 fields such as public administration, energy and minerals, economic and trade, manufacturing, party and government, business services, water and environmental management industry, culture and sports, transportation and logistics, and finance, etc. The project levels involve ministerial seminars, department and bureau level seminars and technical training courses. By the end of 2022, the college had completed 230 foreign aid training programs, including 43 online programs, training a total of 6,023 participants from 134 countries and regions. The rich experience in foreign aid training has laid a solid foundation to continue to undertake national foreign aid training tasks.</p> <p>In recent years, the college has hosted more than 10 mineral-themed seminars, including "Seminar on Mineral Resources Development and Management for Developing Countries", "Seminar on Geological Minerals and Mining Development in Myanmar" and "2019 Seminar on Mineral Resources Development and Management for Chad" and "2018 Seminar on Mineral Resources Development and Management for Ghana", training results were well received by the participants.</p>
<p>Seminar Content</p>	<p>The seminar is carried out in various forms such as special lectures, seminars and visits, as well as visits and exchanges to relevant enterprises, using a combined approach of theory and practice to share China's experience with participants in a comprehensive manner.</p> <p>1. Main courses offered</p> <p>(1) A general review of China: political, social and historical developments of China;</p> <p>(2) Introduction to Mineral Resources in the World: an introduction to the classification and general distribution of mineral resources as well as metallic resources, non-metallic resources, energy resources;</p> <p>(3) The Development and Management of Mineral Resources of China: introduce the distribution law of mineral resources in China and its current situation of development and management of mineral resources;</p> <p>(4) Economic Geology: introduce the concepts of earth sciences and economic geology, the global distribution of minerals and the costs and benefits of mineral extraction, and classification of general metallic minerals, rocks and minerals;</p> <p>(5) Introduction to China's mineral resources law: introduce the overview of The Mineral Resources Law and the main contents of the Mineral Resources Law, and the policies of foreign investment in China's mining industry;</p> <p>(6) Factors affecting mineral development: introduce the factors of ore deposit geology and economic geography and the economic and technological factors will be involved as well.</p> <p>(7) Methods for Mineral Exploration: introduce the remote sensing prospecting method and geological, geophysical and geo-chemical prospecting method;</p> <p>(8) Modern mine design and management: introduce how to use modern management principles, functions and means to realize mineral resources development and utilization in the operation of mining enterprises;</p> <p>(9) Green mine construction system and standards: introduce the green mine construction specifications of nine major industries issued by the Ministry of Natural Resources of China, and introduce the green mine construction specifications with examples;</p> <p>(10) Mineral resources development and environmental protection: introduce influence factors of mineral resources economic value and environmental protection;</p> <p>(11) Mine land reclamation and restoration technology: introduce the reform and policy of land reclamation, as well as supervision measures to improve the reclamation and ecological restoration mechanism.</p>

2.The overall situation of the lecturers

- (1) Gan Jiahui: Jiangxi Normal University, Associate Professor;
- (2) Liu Xiaodong: East China University of Technology, Professor□
- (3) Pan Jiayong: East China University of Technology, Professor□
- (4)Xie Qingxia: East China University of Technology, Professor□
- (5) Zhou Zihui: China Nerin Engineering Co.,Ltd, Senior Engineer□
- (6) Wang Xiaojun: Jiangxi University of Science and Technology, Professor
- (7) Xia Fei: East China University of Technology, Professor□
- (8) Wang Liang: China University of Mining and Technology, Researcher
- (9) Gong Zhijun: East China University of Technology, Associate Professor.

3. Symposium

- (1) About the current status of development and management of minerals in your country.
- (2) Discuss how to achieve sustainable development for mining industry in your country.
- (3) Exchange and sharing of training results.

4. Field -trip study tour

- (1) Visit to relevant units in Hangzhou and Shanghai for study and research.
- (2) Visit to relevant mineral enterprises in Chongyi county.
