About the Organizer	<p>Wuhan Textile University is one of the first batch of universities to be constructed by the National "Central and Western Universities' Basic Ability Construction Project", the university to be implemented by the Ministry of Education's "Excellent Engineer Education and Training Program", the university to be constructed as "Domestic First-class Discipline" in Hubei Province, and the top ten famous fashion schools in China. Wuhan Textile University is the only university with the title of "Textile" in China. It is a university with coordinated development of multiple disciplines such as science, engineering, liberal arts, economics, management and art. It is a university with distinctive characteristics and outstanding advantages, and the economics major is the first-class major of the university. The subject groups of "Advanced Manufacturing and Textile Equipment" and "Big Data and Intelligent</p>		

	<p>Management" have been listed in the key construction of the advantageous characteristic subject groups of the "14th Five-Year Plan" provincial universities in Hubei Province.</p> <p>At present, Wuhan Textile University has more than 2000 faculty members, including more than 1400 full-time teachers, including more than 800 teachers with senior titles and more than 800 doctors. 1 self-trained academician of Chinese Academy of Engineering, 1 academician of Russian Academy of Natural Sciences, 7 long-term academicians and foreign academicians; There are more than 10 national-level talents and more than 200 provincial-level talents.</p> <p>Wuhan Textile University has implemented the action plan to improve its scientific and technological innovation ability, cultivated major scientific research achievements, paid attention to technological innovation, accelerated the transformation of achievements, and constantly improved its scientific and technological competitiveness. A number of scientific research achievements have reached the international and domestic advanced level, and it is in a leading position in textile, machinery manufacturing, economics, management and other aspects of research. Wuhan Textile University is willing to give full play to its advantages and share the latest research results in the field of economic globalization and intelligent manufacturing with relevant developing countries, so as to jointly promote the improvement of technology and trade in the field of economic globalization and intelligent manufacturing.</p> <p>Foreign Aid Project Management Center of Wuhan Textile University, formerly known as Hubei China Europe International Vocational Education and Training Center (CEVTC for short), co-operates with the International Exchange and Cooperation Office and the School of International Education. The center is a training base for business talents in Hubei Province, and also a foreign aid project organizer of the Ministry of Commerce of China. The university began to undertake foreign aid projects of the Ministry of Commerce in 2006, covering many fields such as economy and trade, textile and clothing, and enterprise management. By the end of 2022, the Seminar on Economic Globalization, Seminar on International Trade Capacity Building for Developing Countries, Seminar on Economic Globalization and Industrial Transfer, Seminar on Economic Globalization and Made in China, Seminar on South-South Cooperation for Africa's Economic Development, Seminar on Trade Facilitation for Developing Countries, and Seminar on Developing Countries have been successfully held More than 100 foreign aid programs, such as the Cotton Processing, Textile and Trade Seminar and the Textile Production Management Seminar, have trained more than 2,000 government officials and technical personnel from more than 90 countries or regions. Through foreign aid training, developing countries share development experience and practical technologies, and help developing countries cultivate talents and build platforms for students to exchange in related fields, good results have been achieved in promoting China, promoting Hubei and serving diplomacy.</p>
Seminar Content	<p>The economies of developing countries constitute an important part of the world economy. This workshop aims to share the development and innovation experience of China's manufacturing industry, the production management experience of China's modern intelligent manufacturing enterprises, analyze the international economic and trade situation, interpret the latest trade policies, improve the production management ability of enterprises in developing countries, organize online exchanges and other activities between Chinese and foreign business communities, through online learning and communication, by publicizing the latest national strategies. To build the exchange platform between Chinese enterprises and enterprises of developing countries in the field of intelligent manufacturing, promote the development of manufacturing industry in developing countries, especially strengthen the capacity building of developing countries in the field of trade promotion and intelligent manufacturing, promote Sino-foreign economic and trade cooperation, promote the common development of global manufacturing industry, and contribute to the economic globalization of developing countries. Through this workshop, students will have a better understanding of globalization and the development of China's economy, as well as the successful experience in the development of China's manufacturing industry, and apply what they learn to contribute to the economic development of their own countries. At the same time, it will also help build a bridge of friendship and cooperation between China and other countries.</p>
