About the Organizer	<p>1. International Health Exchange and Cooperation Centre, National Health Commission, P.R. China (IHECC) is an independent legal entity, directly led by NHC, specializes in international exchange and cooperation in the field of health. It is responsible for organizing research on the theory, policy and development strategy of international cooperation in the field of health and providing policy suggestions and technical advisory services on legislation, government decision-making and regulation planning. IHECC drafts operational regulations and technical specifications for international exchanges in health industry, undertakes international health assistance projects, carries out charity health cooperation projects both in and outside China, and strives to promote global cooperation for the development of health industry. The Center has been undertaking foreign aid training programs of MOFCOM for 17 years. It finished 81 programs, receiving almost 1,877 trainees from more than 92 countries and regions.</p> <p>2. IHECC has established the two principles of "training with the best resources" and "multi factors, multi benefits, whole links and long-term development", actively explored the remote training mode of foreign aid projects, and made full use of online conference system and video recording. This will enable health professionals from the Belt and Road countries participating in the foreign aid training program to know more about the pathway of health development, enhance mutual understanding and promote mutual learning, as well as achieve the goal of consultation, construction and sharing of a global community of health for all.</p> <p>3. IHECC attaches great importance to foreign aid training and has a rigorous organization, coordination and management mechanism. IHECC has carried out hundreds of health training programs in China, with profound technical and faculty resources, and the ability to leverage and integrate the forces of government, academia, and industry.</p> <p>4. IHECC has established long-term and good cooperation with relevant departments of the National Health Commission P.R.C, Peking University, Tsinghua University, Fudan University and other research institutions, set up multiple maternal and child health training bases in China by the Belt and Road Maternal and Child Health Cooperation Project. The faculty resources</p>	

	<p>including director general and experts from relevant government departments and top-level research institutions in China. Especially since the outbreak of the COVID-19 pandemic, our center has successfully held three times online training courses, including " Training Course on Maternal and Child Health Care for Developing Country," " Training Course on Somalia Nursing Technology," and the " Training Course on Reducing Infant and Maternal Mortality Rates in African Countries" in 2021 and 2022, with good enrollment and excellent course design. It has been well received by them.</p>
<p>Seminar Content</p>	<p>This 21-day training course will be hold in Beijing, China. The aim of the course is for participants to fully understand the effective practices and successful experiences of breast cancer and cervical cancer Screening screening project for rural women in China, and to extract applicable and transferable experiences for their own countries. The course will also clarify the specific technical support that China can provide in the field of "Two Cancers" screening. By improving participants' professional skills and evidence-based decision-making abilities in the field of breast cancer and cervical cancer screening, the course can promote the survival and health levels of local pregnant women and newborns. The teachers for this training course mainly come from Chinese Class A tertiary hospital, such as Peking Union Medical College Hospital and the Cancer Hospital Chinese Academy of Medical Sciences, National Center for Women and Children's Health, China CDC.</p> <p>The main courses of this training course include (1) Public courses: Introduction of Chinese National conditions and medical and health conditions; Chinese medical and health system reform; Chinese international cooperation in medical and health care; and Chinese action on global health governance; (2) Specialized courses: divided in 4 modules, breast cancer examination (breast physical examination, breast color ultrasound examination and mammogram examination); cervical cancer examination (gynecological examination, cervical cancer preliminary screening, colposcopy examination, histopathology examination); abnormal or suspicious case follow-up management, social publicity and health education.</p> <p>During the training, participants will be organized to visit " China-Hospeq 2023" related activities; visit the site activities of tertiary hospital, medical institutions and community health service centers in Beijing and other province, and having in-depth discussions and exchanges</p>

	<p>with relevant personnel. Cultural exchanges will also be arranged to enhance the friendship between people of different countries.</p>
