About the Organizer	<p>Beijing Holley-Cotec Pharmaceuticals Co., Ltd, a professional medical company, is devoted to developing international medical market and promoting Chinese medical products. It has nearly 100 employees with 8 divisions inside and 4 subsidiaries in Africa. Artemisinin-based anti-malarial products have been registered with more than 40 countries in Africa and Southeast Asia by the company; and the marketing network has been developed as well. Good reputation and wide acceptance have been created by the products in both of the governments and patients from the epidemic areas. At present, the company is growing fast in the business of medical equipment. It has built up a domestic group union for exportation and cooperation of medical equipment. Holley-Cotec is introducing Chinese high-tech medical equipment to developing countries via the marketing platform in those countries, hence the people in those countries is benefit on it.</p> <p>Since 2007, Beijing Holley-Cotec Pharmaceuticals Co., Ltd has hosted 33 successive sessions of projects on China Aid and Technical Training for officials in developing countries, which are sponsored by Ministry of Commerce of the People's Republic of China. The company has become a key international platform of human resource training and technical exchanges through those China aid and training programs, such as malaria control, medical devices operation and management of import and export on medicine, By December, 2022, more than 1000 officials and technicians from 80 developing countries have been trained successfully.</p>	
Seminar Content	<p>The seminars will be held in the form of live streaming lectures, real-time exchange of questions and answers, sharing and discussion, and cloud visits. We will organize lectures by relevant managers and experts with professional and practical experience in medical devices, giving the training as follows:</p> <p>1.General course:</p> <p>1)China's national conditions: mainly introduces the current political, economic, social and cultural development of China and its achievements since the founding of the People's Republic of China more than 70 years ago and the reform and opening-up of China more than 40 years ago.</p> <p>2)China's experience in poverty alleviation and elimination: an introduction to China's approach to eliminating extreme poverty including poverty reduction schemes and targeted poverty alleviation measures.</p> <p>2.Specialized course:</p> <p>1)Regulatory systems and mechanisms of medical devices: <input type="checkbox"/> Interpretation of Regulations for the Supervision and Administration of Medical Devices; <input type="checkbox"/> Product registration, review, post marketing regulation system, and Chinese experience of medical equipment; <input type="checkbox"/> Interpretation of international regulatory system and mechanism of medical devices.</p> <p>2)China's life circle management modes of medical equipment: <input type="checkbox"/> Safety and risk management of medical equipment; <input type="checkbox"/> Informatization management construction of medical equipment; <input type="checkbox"/> Quality control and preventive maintenance schemes of medical equipment.</p> <p>3)Hot topics for industry-university-research innovation and development of medical equipment: <input type="checkbox"/> present development state and future trend of medical equipment; <input type="checkbox"/> Road of</p>	

industry-university-research innovation and development of medical equipment in the international view; □ Experience sharing from "following" to "leading" of China's medical equipment industry.

4)Real issues under discussion of medical equipment management combined with current situation: □ Research and discussion of management and innovation modes of medical equipment of Belt and Road countries □ Innovative management model of medical devices in the post-epidemic era.

3.Discussion and exchange activities:

1) Seminar on the theme of "management mode and hot issues of medical equipment": Medical equipment is an indispensable product of auxiliary diagnosis for clinical medicine, so its normal operation and quality maintenance are essential to ensure the normal progress of clinical diagnosis and treatment. The innovation management mode of medical equipment has always been the focus and difficulty of medical equipment managers of hospitals. Therefore, the seminar on the theme is specially set up. Participants shall participate in the exchange in combination with the situation of medical device management mode in domestic hospitals;

2) Seminar on "Innovative Medical Equipment Management Model in the Post-Epidemic Era": The global outbreak of COVID-19 has brought new challenges to medical staff and new requirements for medical device management. To this end, we organize this seminar and invite you to participate in the exchange based on innovative models of medical device management in your country in the post-epidemic era.

3) Seminar on the theme of "Road to Innovative Development of Medical Equipment under the Industry-University-Research Cooperation": The road to innovative development of medical equipment under the industry-university-research cooperation is one of the effective ways to improve the level of auxiliary diagnosis and treatment of medical equipment. Therefore, this thematic seminar is specially arranged. Participants shall participate in the exchange after preparing the policies and modes related to the innovative development of medical equipment under the industry-university-research cooperation of their own countries.

4.Visits:

To help the participants understand and be aware of the use and operation of medical devices in China, visits to medical device manufacturers and practice operations will be organized;

1) We are going to Suzhou for a visit and practical internship to IntoCare Medical Technology Co., Ltd., a global provider of high-tech medical equipment and solutions, to learn about the use of interventional medical devices.

2) We are going to Hangzhou for a visit and internship to Ustar Biotechnologies (Hangzhou) Co., Ltd., a leading global life science frontier organization, to learn about the use of in vitro diagnostic products.

3) We are going to Beijing for a visit and internship to Hygea Medical Technology Co., Ltd., an advanced company in the cold and heat combination ablation industry, to learn about minimally invasive tumour techniques.

5.Cultural experience

To give participants a taste of Chinese culture, we intend to arrange visits to traditional Chinese places of interest on weekends.
