About the Organizer	<p>Hunan Children's Hospital is a comprehensive children's hospital which integrates clinic, scientific research and teaching. Furnished with 1,800 beds and staffed with 2,000 employees, the Hospital has 29 clinical departments, 40 wards and 9 medical labs.</p> <p>As the Pediatric China-aid Medical Training Unit in China, the Hospital is the training base for Maternal & Child health for Belt and Road countries. Since 2006, 97 training projects have been carried out, with over 2,800 trainees from more than 100 countries and regions. The training includes over 10 topics such as pediatric severe disease, neonatal medicine, pediatric care technology, maternal and child health care, laboratory techniques, traditional Chinese medicine and hospital management. English, French, Portuguese, Russian and other languages are used for teaching.</p> <p>In 2016, the Hospital undertook two China-aid innovative projects of Maternal and Infant Health Project in Sierra Leone and Cambodia. The Projects aimed at offering pediatric appropriate technologies to 200 local medical workers, ward rounds and free consultation for</p>

over 200 local children. In 2017 and 2018, the Hospital sent medical experts to Zanzibar and Fiji to organize overseas training projects on hospital management, pediatric appropriate techniques and pediatric care. It has won praise from Ministry of Health of Zanzibar and Fiji and the local Chinese Embassies. The training project has turned out to be a success with good social benefits and international impact, which was given follow-up reports by Hunan Daily, Health Daily, China Daily and local media.

The Hospital has set up the pediatrics technology training team for developing countries covering foreign affairs management, foreign-related teaching and medical translation, formed by hospital experts, professors and backbones including 3 experts who are awarded with Special Allowance of the State's Council, 20 experts taking positions in National Professional Committees, 30 experts taking positions in Provincial Professional Committees, and more than 100 teachers who have worked or studied abroad. To meet the needs of training topics, the hospital continuously expands the teaching team by inviting international experts and experts from the province's health system, such as government health officials, medical and health policy experts, maternal and child health experts, disease prevention and control experts to participate in foreign aid teaching and exchange activities. The Hospital attaches great importance to cultivate international talents and created an international medical simultaneous interpretation team of more than 20 people, providing a good translation guarantee for medical foreign aid teaching. The Hospital regularly organizes special translation training and English activities to improve the professional level of translators.

The hospital innovatively developed the "China Aid Training Online Teaching" platform, with designed functions such as student management, live class, high-quality recorded course, questionnaire survey, and follow-up evaluation. Under the global pandemic, the Hospital actively carried out the "Global Anti-epidemic Experience Sharing Session" through the International Telemedicine Center, and successfully hosted the "Xiaoxiang Pediatrics International Forum" and "Pediatric Forum for Developing Countries" in an online and offline mode.

With the deepening of international cooperation among hospitals, the Hospitals actively responded to the "Belt and Road Initiative" and led the establishment of the "Child Health Cooperation Network of Developing Countries" aimed at improving management of medical services, enhancing exchange and cooperation in the field of medical specialty and technology, improving high-quality personnel training and scientific research cooperation in pediatrics related fields and enhancing the medical service ability and medical service management level of China and developing countries.
