About the Organizer	<p>Wuhan Research Institute of Posts and Telecommunications (WRI) is one of the two research institutes directly under Ministry of Posts and Telecommunications (predecessor of Ministry of Information Industry). It's one of the two foreign-aid training bases — communication training bases of Asia-Pacific Telecom Union (APT) — under Ministry of Industry and Information Technology, and the only qualified foreign-aid training base under Ministry of Commerce in the field of communications. WRI is also among the first enrolling and training units authorized by the state council to confer master's degree, as well as a pilot unit for co-developed doctoral programs with Ministry of Education. WRI covers an area of about 1100 acres, over 300,000 m² of which is covered by buildings for production, scientific research and workshops, with total assets of over 12 billion RMB.</p> <p>Since 1994, authorized respectively by Ministry of Commerce, Ministry of Information Industry, Ministry of Foreign Affairs and Ministry of Science and Technology, WRI has conducted more than 100 foreign-aid training projects, with about 4000 participants from over 100 countries of 5 continents. For more than a decade, WRI has been actively exploring new ways and integrating research into practice. The number of foreign-aid training programs administered by WRI has increased from one to more than 30 per year. From its beginnings as an administrator of technology seminars, WRI has become capable of holding seminars for officials at department/division level. The seminars last from 10 days, 20 days to 3 months, offered in either English, French, Russian, Arabic or Spanish.</p> <p>Nevertheless, we will continue to make efforts and fully exploit our strengths and experience in terms of communication technologies and foreign-aid training so as to conduct characteristic, high-level and influential training projects, and make greater contribution to the implementation of national economic trade strategies of all countries.</p>	

<p>Seminar/ Training Course Content</p>	<p>Sponsored by Ministry of Commerce of the People’s Republic of China, “Seminar on Big Data Application Impact and Telecom Business Analysis” will be held during November 7 – November 20, by Wuhan Research Institute of Posts and Telecommunications (WRI). Academicians and ITU-T Experts, such as Mr. Zhao Zisen and Mr. Yu Shaohua from WRI will deliver lectures.</p> <p>The seminar mainly includes the following arrangement: Overview of big data industry, key technologies and applications of big data industry, development status and experience of China's big data industry, big data analysis technology, data mining technology theory, development experience of Chinese operators; business development experience of Chinese operators; Chinese operators Network construction experience and so on.</p> <p>Besides, the seminar, which combines teaching with practice, will arrange visits to Chinese famous ICT companies, such as Wuhan East Lake Big Data Trading Center, CICT and CTY, Fully familiar with key technologies related to big data and the use of digital products in telecommunication services. In addition, field trips will be arranged to Changsha City, Hunan Province and Guilin City, Guangxi Autonomous Region. Investigate Changsha Telecom and Guilin Mobile so that participants can deepen their understanding of the development of information technology and network-related industries and can better grasp the knowledge they have learned, and lay a good foundation for further exchanges and cooperation between China and developing countries.</p>
