

ASSURING FOOD SAFETY THROUGH AN EFFECTIVE NATIONAL FOOD CONTROL SYSTEM

14 TO 18 JUNE 2021

Sponsored by the

SINGAPORE COOPERATION PROGRAMME

under the

SCP TRAINING AWARD (E-LEARNING)

to be conducted by

Singapore Food Agency

Singapore Cooperation Programme

Singapore has provided technical assistance to other developing countries since the 1960s. As a country whose only resource is its people, Singapore believes that human resource development is vital for economic and social progress. Singapore itself has benefited from training provided by other countries and international organisations.

In 1992, the Singapore Cooperation Programme (SCP) was established to bring together under one framework the various technical assistance programmes offered by Singapore. Through the SCP, the range and number of training programmes were increased to share Singapore's development experience with other developing countries.

To date, over 131,000 officials from more than 170 countries and territories have participated in our courses and study visits. The SCP is managed by the Technical Cooperation Directorate of the Ministry of Foreign Affairs, Singapore.

Singapore Food Agency

The Singapore Food Agency (SFA) was formed as a statutory board under the Ministry of the Environment and Water Resources (MEWR) on 1 April 2019 to oversee food safety and food security from farm-to-fork. MEWR has been renamed as the Ministry of Sustainability and the Environment (MSE). The SFA brings together food-related functions carried out by the former Agri-Food & Veterinary Authority of Singapore, the National Environment Agency and the Health Sciences Authority.

As the lead agency for food-related matters, SFA's mission is to ensure and secure a supply of safe food for Singapore. SFA works hand-in-hand with the industry and consumers to grow our three "food baskets" – Diversify import sources, Grow local, and Grow overseas, as well as ensure food safety from farm to fork. SFA also partners food businesses to strengthen capabilities, tap on technologies to raise productivity, undertake research to develop new lines of business, and catalyse industry transformation to ensure food security.

Course Objectives

This course will share Singapore's national food control system and strategies to improve food safety and security.

Synopsis

Topics to be covered include:

- Food safety policy and legal framework
