---

#### Singapore Cooperation Programme

Singapore has provided technical assistance to other developing countries since the 1960s. As a country whose only resource is its people, Singapore believes that human resource development is vital for economic and social progress. Singapore itself has benefited from training provided by other countries and international organisations.

In 1992, the Singapore Cooperation Programme (SCP) was established to bring together under one framework the various technical assistance programmes offered by Singapore. Through the SCP, the range and number of training programmes were increased to share Singapore's development experience with other developing countries.

To date, close to 150,000 officials from more than 180 countries, territories, and intergovernmental organisations have participated in our courses and study visits. The SCP is managed by the Technical Cooperation Directorate of the Ministry of Foreign Affairs, Singapore.

#### Saw Swee Hock School of Public Health

The Saw Swee Hock School of Public Health (SSHSPH) under the National University of Singapore, is the first and only full-fledged public health tertiary education institution in Singapore. SSHSPH aims in improving the health and well-being of communities through research, education, and policy advocacy. The school strives to generate evidence-based knowledge, develop public health leaders, and contribute to policy formulation that promotes better health outcomes.
